## Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

## DETAILED ACTION

### *Allowable Subject Matter*

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or disclose a semiconductor device package, comprising: a semiconductor die having a first surface on which an integrated circuit and at least one electrically conductive bond pad are fabricated, the die having first and second pairs of opposed lateral edges; at least one electrically conductive external terminal; an interposer having a die attach surface and an external surface opposite of the die attach surface disposed in between the semiconductor die and the at least one external terminal, the interposer having at least one electrically conductive interconnect electrically coupling the at least one bond pad of the semiconductor die positioned adjacent to the die attach surface to the at least external terminal positioned adjacent to the external surface, the interposer being formed of an organic substrate or a polyimide substrate; and a plurality of elongated strips of compliant adhesive film, each strip having a first length and a second length perpendicular to the first length, the first length being substantially greater than the second length, the strips extending substantially the entire distance between the first pair of opposed lateral edges and disposed between the semiconductor die and the interposer, a sum of the second lengths of the elongated strips being substantially less than a distance between the second pair of opposed lateral edges of the semiconductor die, the strips further including a compliant carrier layer having a pair of opposing surfaces with a first

adhesive layer disposed on a first surface of the opposing surfaces of the carrier layer to adhere the carrier layer to the die attach surface of the interposer, and a second adhesive layer disposed on a second surface of the opposing surfaces of the carrier layer to adhere the carrier layer to the die.

Mitchell (6,169,328) in view of Chan (5,461,255) disclose said package (see prior Office Action), except the adhesive strips do not have a cumulative width that is substantially less than the width of the die. Applicant has disclosed in the instant specification (p.9) that several narrow strips produce a smaller coefficient of thermal expansion (CTE) between a chip and a carrier than one or two large strips. Therefore, Applicant has shown unexpected results by providing strips that are substantially narrower than the die width, and the strips of Chan do not disclose this claim limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
